

A Tagged Paper

Introduction

This introduction paragraph carries enough prose to survive any minimum-length floor a chunker may apply, and it mentions the retrieval budget explicitly so a search for the word budget lands here.

A second paragraph follows the first, so the section holds more than one block of text and the paragraph splitter has something to do.

Method

The method section describes the procedure in ordinary prose without any table or figure, so its page should count no image objects.

Results

Table 1 reports the measured values for each configuration.

Table 1. Measured values.

Configuration	Cells	Seconds
baseline	803	4.2
four images	1591	7.9

Discussion

Figure 1. A solid green rectangle used as the chart stand-in.

The discussion refers to Figure 1 above and closes the document.
